ANNOUNCEMENT

As we have already informed, on 12 June 2009 started the implementation of the Project "Modern and Effective Administration in the municipality of Dve Mogili", that is implemented with the financial support of Administrative Capacity Operational Programme, co-funded by the European Social Fund Contract A 09-31-38 C/12.06.2009. Its general objective is development and improvement of administrative services in Dve Mogili Municipality.

We managed to start a tender for implementation of Activity 1 and Activity 2, although there was little delay in the work plan, which did not hinder their implementation on time. We know how important is the organization of clear public procurement both to enhance public confidence and for strict observance of the legislation that we follow. Therefore, the municipal management team and project team make them maximum clear and popular. Right step in this direction is our purpose to keep the effective spending of the grants from the European Social Fund.

In January finished the study and implementation of Activity 1 and Activity 2 with subject "Analysis of the current situation of administrative services and processes in the Municipality of Dve Mogili" and "Updating the Internal Rules for Provision of Administrative Services", which was entrusted by public procurement to the contractor "Europrojects Point" Ltd. Sofia. Before providing the updated Internal Rules for Administrative Services, lecturers from "Europrojects Point" - Sofia conducted training to target groups of the project, namely the representatives of the municipal and mayoral administrations and NGOs, where they presented results and recommendations from the analysis of the current situation of administrative services and internal rules and innovations in the administrative services.

At the end of January 2010 a contract was prepared and concluded with an accredited company to perform an inspection for certification of technical specification for upgrading the Administrative Information System and bringing it in accordance with the Electronic Governance Act and development of electronic public registers under Art. 106 of the Regulation on common requirements for interoperability and information security. After receiving the certificates the executor of Activity 4 "Development of Electronic Public Registers" will be approved by submitting three proposals under the law and the executor of Activity 5 "Upgrading the Administrative Information System and bringing it in accordance with the Electronic Governance Act" will be elected by the negotiated procedure under the law to the owner of the copyright "David Holding" Ltd. - Kazanlak.

Documentation and invitations were prepared for the beginning of Activity 8 "Audit of the project" by call for proposals not less than three offers. By the end of February 2010 an executor will be chosen.

Dragomir Damyanov
Mayor of Dve Mogili Municipality

Date: 10 February 2010
